

Ubiquitous Tables:

Simple Schematic Diagram of BASE Table Relationships

Boxes represent database tables
 Boxes are color-coded to divide tables into functional areas of the database
 Connector edges represent logical connections between tables
 Closed-circle endpoints represent 0..more relationships
 Open-circle endpoints represent 0 or 1 relationships
 Free edge tails represent exactly 1 relationship

Tables and Subclasses (not shown) meet MIAME recommendations

The full database table definitions and source code can be downloaded from the website
