

Figure S2 Correlations between **Intergenic CGI** density and genomic features in 9 mammalian genomes **(A)** Intergenic CGI density (per Mb) vs. number of chromosome pairs. **(B)** Intergenic CGI density (per Mb) vs. \log_{10} (chromosome size). **(C)** Intergenic CGI density (per Mb) vs. chromosome GC content (%). **(D)** Intergenic CGI density (per Mb) vs. chromosome $\text{Obs}_{\text{CpG}}/\text{Exp}_{\text{CpG}}$.
